

Shure-Line Construction recently designed, fabricated, and delivered six (6) condensate recover skids. The scope of work included:

- Design & fabrication
- Vessel fabrication
- Piping design & fabrication
- Shop prime painting

CONDENSATE RECOVERY SKIDS

DELAWARE

2022

From start to finish, this project was completed in less than a month after approval of drawings, illustrating the benefits of shop fabrication. A controlled shop environment facilitates high quality at a reasonable cost while minimizing rework and waste. All the customer's expectations of project execution were exceeded.
